Not all settings are the same – Demographics

Not all settings are the same – Demographics

Not all settings are the same – Demographics

- Africa:
 - 15% of world's population but 2.6% of all papers published
 - Percentage of GDP invested in science: average < 1%
 - Germany 2.8%
- Gender:
 - Only 28% of all researchers are women

Research & education benefit from Open Source / affordable Hardware

Many independent developments

GOSH – Gathering for Open Science Hardware

- Establishing a network of networks:
 - Build cohesive group while maintaining autonomy in each subgroup
 - Optimize efforts/resources
 - Understand what is necessary to make OSH more present
 - Dialogue with agencies/policy makers
 - Give space to voices that are normally not heard

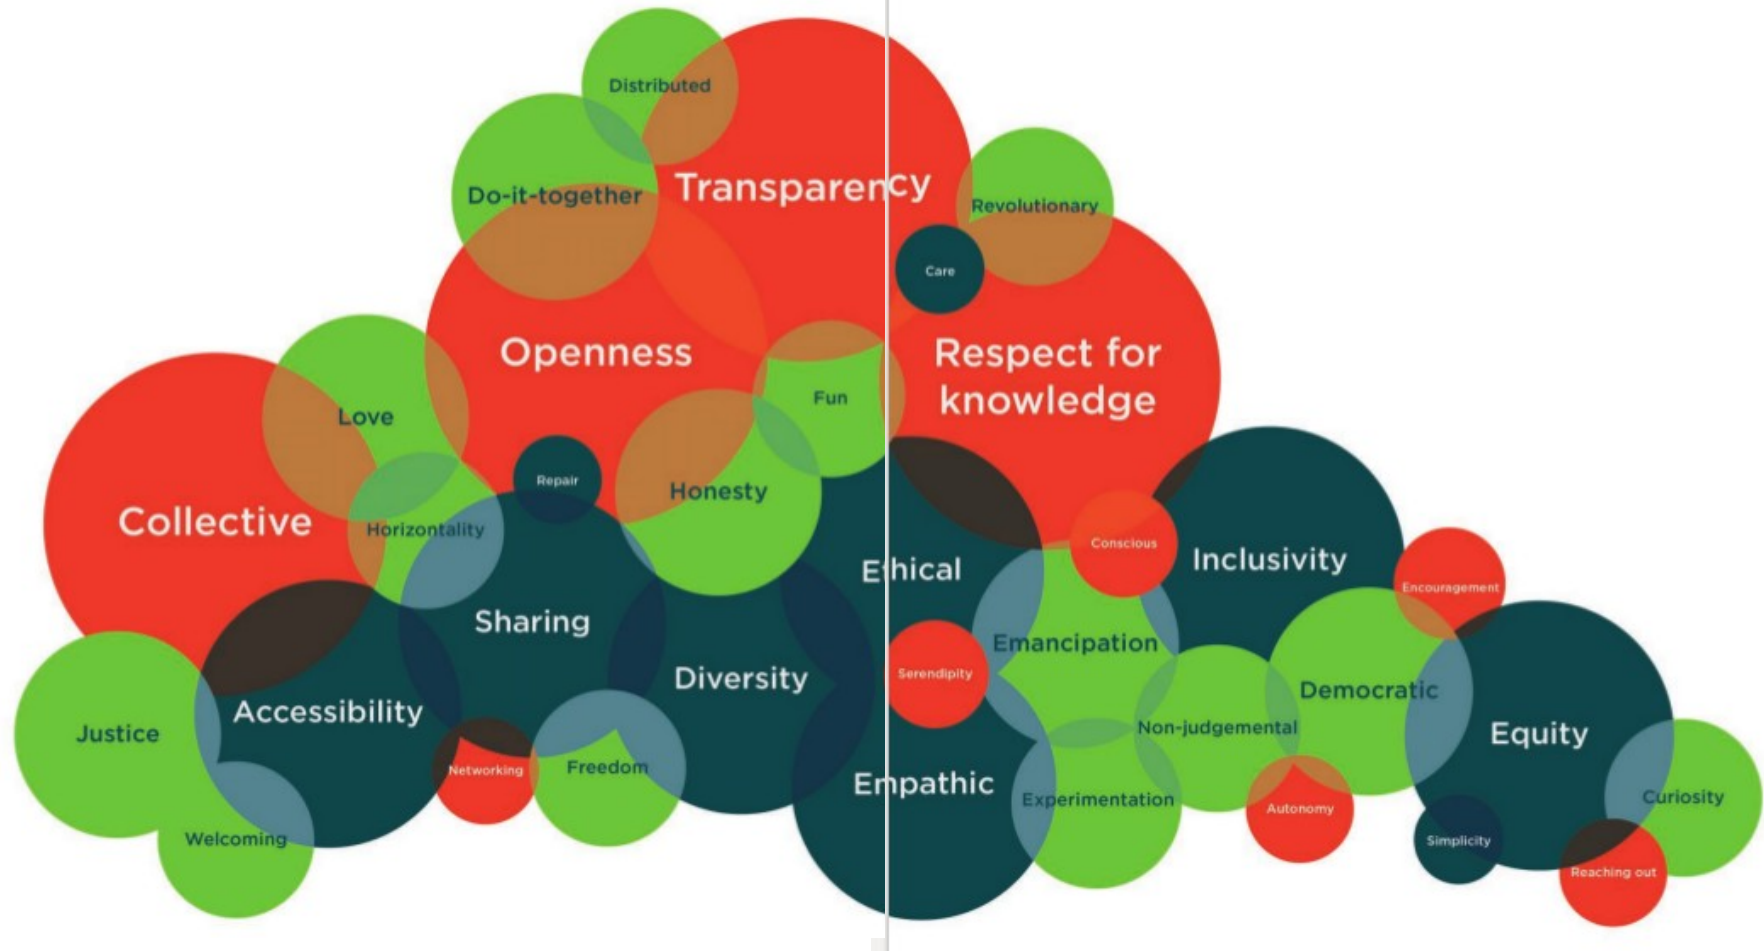

GOSH 2017

100 PARTICIPANTS FROM 30 COUNTRIES

**THE GROUP INCLUDED SCIENTISTS, SOCIAL SCIENTISTS, ARTISTS,
LAWYERS, ARCHITECTS, COMMUNITY ORGANIZERS, DEVELOPERS,
TEACHERS, AND STUDENTS**

GOSH 2017

GOSH 2017

WHO WE ARE

THE **GLOBAL OPEN
SCIENCE HARDWARE
COMMUNITY (GOSH)** IS
A DIVERSE GROUP OF
PEOPLE UNITED BY THE
GOAL OF MAKING OPEN
SCIENCE¹ HARDWARE
UBIQUITOUS BY 2025.

GOSH – Gathering for Open Science Hardware

- Establishing a network of networks:
 - 2 gatherings so far:
 - Geneva, Switzerland 2016
 - Santiago, Chile 2017
 - The next one to happen in Shenzhen China 2018
 - In focus: think about ways to bring prototypes to production scale

GOSH 2016

GOSH – Gathering for Open Science Hardware

- Establishing a network of networks:
 - Gatherings output:
 - Report after each event
 - Manifesto (Show and Please sign it!)
 - Roadmap – Guidelines/suggestions to make Open Science hardware ubiquitous by 2025
 - Many interdisciplinary collaborations / spin off events
 - Forum

GOSH Manifesto

- Fast read on what Open Science Hardware represents:
 - Created collaboratively by more than 100 people, translated into 7 languages
 - Major points:
 - Accessible
 - Ethical
 - Empowers people
 - Democratizes science and makes it better

GOS

- Fast

sents:
nslated

Gosh Roadmap

- Longer read on guidelines and suggestions to make Open Science Hardware Ubiquitous by 2025
 - Again written by many hands
 - Goals:
 - Make copies reach policy makers / funding agencies etc.
 - Reference for the community when planning/executing events
 - Lessons:
 - Not possible to have one solution to fit all needs / demands
 - Local chapters are needed

GOSH Collaborations / spin off events

- Africa OSH (Similar to GOSH but more focused on needs and specialties of Africa)
- GOAT (Gathering for Open Agricultural Technologies)
- Advanced School on Open Labware (Give participants space and time to build hardware for 2 weeks)
- Open source hardware event at Re:publica
- Building drones with populations in at-risk areas
- Many new subgroups formed with common interests

Gosh Forum

- >300 people
- Active / welcoming space to find:
 - Collaborators
 - Funding opportunities
 - Suggestions and resources for projects
 - People willing to debate concepts / ideas

Read about GOSH

Punk science

Do-it-yourself science is taking off

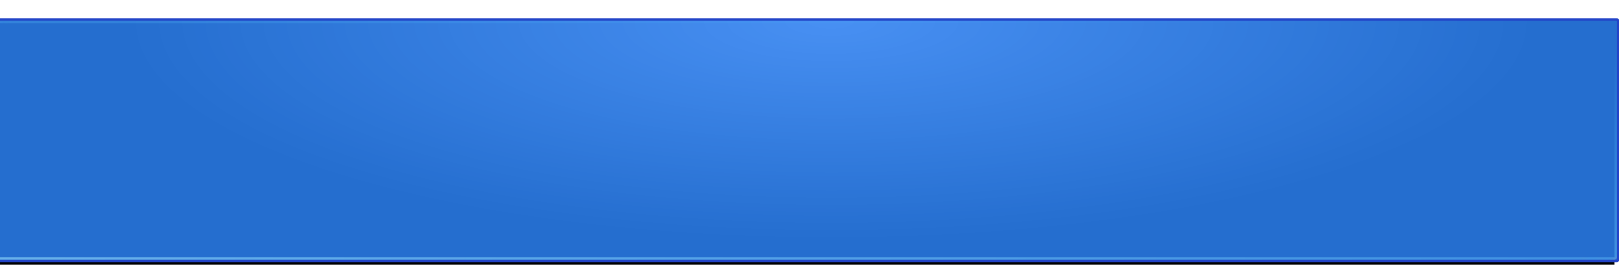

A growing movement seeks to make the tools of science available to everyone (including you)

Summary

- GOSH:
 - Closer to true diversity / global society representation
 - Interdisciplinary (Science and arts, academics and non-academics)
 - Network of Networks with common goals

Thank you!

- 
- Balancing representation of different interest groups and contexts requires negotiation and will not always be successful: OScH is found in traditional institutions but also progressive grassroots organisations; it is used as a tool to improve the reproducibility of academic science and to teach adults and children in disadvantaged communities. It was more difficult than anticipated to create a document which presented all of these perspectives and that balanced the need for change in incumbent institutions with promotion of non-traditional forms of engagement. After much redrafting and negotiation we believe we managed that goal successfully. What

Introduction

Science & Education funds

- Some figures if possible on GDP percentage
- Tax money for research

Research demographics

-
- 28% of women in science
